**DETAILED ACTION**

***EXAMINER'S AMENDMENT***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as per telephone authorization from applicant's attorney Mr. Kuangshin Tai on 11/30/2011 as follows:

- In line 1 of claim 47 (page 6), "44" has been replaced with --43--.

***Allowable Subject Matter***

2. Claims 29-43, 45-51 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 29-38, 41, 42 are allowed because the prior art of record neither anticipates nor renders obvious the limitations of the base claim 29 that recites an integrated circuit chip particularly with a pump, the pump comprising: a first opening and a second opening, each opening disposed on the same side of the flexible membrane and providing fluid communication to the pumping volume

Art Unit: 2826

through the conductive layer; and wherein the flexible membrane is constructed and arranged to cover at least one of the first opening and the second opening and produce the pressure sufficient to set a fluid in motion through the ventilating duct so as to cool the integrated chip upon application of the voltage in combination with other elements of the base claim 29.

Claims 39-40 are allowed because the prior art of record neither anticipates nor renders obvious the limitations of the base claim 39 that recites an integrated circuit chip particularly with wherein the second opening is positioned closer to a border of the cavity than the first opening is positioned to the border, the border being between the cavity and an upper surface of the substrate and the first opening positioned closer to a center of the cavity than the second opening in combination with other elements of the base claim 39.

Claims 43, 45-51 are allowed because the prior art of record neither anticipates nor renders obvious the limitations of the base claim 43 that recites an integrated circuit chip particularly with a pump; the pump including a cavity wherein the cavity includes a first opening and a second opening, each opening disposed on the same side of the flexible membrane and providing fluid communication between the cavity and the at least one ventilating duct, wherein the flexible membrane is constructed and arranged to produce the pressure sufficient to cause fluid motion through the at least one ventilating duct so as to

cool the integrated circuit chip upon actuation in combination with other elements of the base claim 43.

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
